# Good Teaching Practices in the Digital Technologies curriculum involves:

1. Integrating authentic project-based learning with other curriculum areas

2. Strengthening links to the General Capabilities and Cross-curriculum Priorities

3. Differentiating teaching through innovative and inclusive approaches

4. Engaging diverse expertise from students, families and community

5. Accessing online repositories for successful strategies and resources

6. Establishing effective classroom workflow and file management processes

7. Networking with successful teachers in similar contexts
